

## Meet the Demand for Pediatric Imaging

As the demand for pediatric radiology is continuing to rise, access to qualified pediatric radiologists remains a critical challenge.

### **Access quality pediatric radiologists 24/7/365**

Pediatric imaging performed by pediatric radiologists offers accurate diagnosis; speeds time to treatment and ultimately reduces the cost of care.

As the largest private radiology practice in the country, our pediatric team interprets nearly 250,000 pediatric cases each year.

### **Pediatric subspecialists**

- Our team of dedicated and experienced pediatric radiologists includes board certified pediatricians, fellowship-trained pediatric radiologists and experienced radiologists. Our expertise supports the care and special imaging required when treating childhood diseases and conditions.
- vRad's pediatric radiologists ensure clients receive the best care possible, whether it's making a timely diagnosis following trauma or assisting in the ongoing care of a critically ill newborn.

### **Demonstrated quality and defined accuracy**

- Our commitment to quality is more than just a slogan. Our industry-leading accuracy rate of 99.6 percent for preliminary interpretations and 99.8 percent for final interpretations plus our high client-retention rate offer strong evidence that our commitment is paying off.

### **A solution that works**

vRad can provide the quality pediatric interpretations necessary to help you meet daytime overflow needs, appropriately staff nights and weekends or simply to add this in-demand subspecialty to your service offering. vRad has the expertise, technology and service to help you provide patient care and grow your business.

**What are you waiting for?** Contact vRad today at 800.681.8616 to solve your pediatric interpretation needs.
