

## vRAD BREAST IMAGING

**Deliver compassionate care and breast-center quality to the women of your community – regardless of your geographic location.**

Many hospitals and clinics – especially rural facilities – can’t staff subspecialty radiologists for every possible need. vRad offers nationwide, on-demand access to 100% fellowship-trained radiologists with extensive training and experience in a full suite of breast imaging services including:

- Digital screening mammography (2D and 3D tomosynthesis)
- Diagnostic mammography
- Breast ultrasound
- Breast MRI

### Become a Breast Imaging Leader in Your Community

Leverage vRad’s clinical and program expertise to grow your practice, meet staffing needs and deliver a truly exceptional level of care to the women of your community.

- 100% of cases read by fellowship-trained breast imaging specialists, certified for 2D and 3D tomosynthesis
- On-demand subspecialty expertise – when you need it
- Same-day diagnostic results for your patients and Live Video Diagnostics
- Mammography results returned within 48 hours on average
- BI-RADS Tracking – vRad covers all of the clinical and regulatory complexities required of a breast imaging program, including BI-RADS tracking as a crosscheck for our clients
- Lead Interpreting Physician (LIP) Service – If you desire, vRad can also provide LIP services to ensure your quality assurance program meets all requirements

*“All mammography cases at our hospital are read by vRad’s fellowship-trained breast imaging specialists. Because we have access to these highly-trained subspecialists, we’re providing a level of quality normally found in breast centers in metropolitan areas, not rural California.”*

Charles H. Harrison, CEO, San Bernardino Mountains Community Hospital District

### Meet Members of the vRad Breast Imaging Team

**Arlene Sussman, MD**  
Medical Director and Director of vRad Breast Imaging

With 20+ years of dedication to breast imaging, Dr. Sussman’s team is ensuring high-quality breast imaging expertise is available to women, regardless of their geographic location.

- Fellowship: Eastern Virginia Medical School, Breast Imaging

**Barbara McCorvey, MD**

- Residency: Hahnemann University Hospital, George Washington University Hospital
- Fellowship: George Washington University Hospital, Breast Imaging

## Deliver Same-Day Diagnostic Results for Your Patients

On designated workdays, your vRad radiologists are available at their workstations, consulting in real-time directly with your technologists via phone, email and **Live Video Diagnostics**.

**Introducing Live Video Diagnostics: Now vRad’s radiologists are literally right by your side** – vRad’s live video and image-sharing consultations significantly enhance communications by bringing the vRad radiologist “face to face” with your technologists and patients – right in your practice or facility.

**For your technologists** – Mammography techs can discuss cases, review and annotate images in real-time, and plan detailed next steps – all “face to face” with the radiologist as if they were in the same room.

**For your patients** – The vRad radiologist can provide a truly exceptional, personalized and compassionate experience by speaking directly with the patient about their diagnostic results via video conference and showing the findings on the images in real-time.

## vRad Snapshot

- Founded 2001 – a MEDNAX Company (NYSE: MD)
