FOR IMMEDIATE RELEASE

vRad Receives Local Honors for Best Company Culture and Health Programs

MINNEAPOLIS, Minn., June 26, 2017 – vRad (Virtual Radiologic), a MEDNAX company and the nation’s leading teleradiology services and telemedicine company, announced today that it has received honors for both its corporate culture and its company wellness programs.

The *Star Tribune*’s 2017 “Top Workplace” recognizes companies who receive high ratings from surveys completed by their employees. According to the survey, vRad was selected because its employees: 1) believe in the company’s mission of providing exemplary patient care, 2) think the company sets a clear direction for its future, 3) feel vRad has a culture of high performance, and 4) agree that vRad creates a strong connection with its employees by showing appreciation and bringing meaning to work.

Hennepin County, Minnesota’s “Wellness By Design” award, which is designated by the Hennepin County Public Health Department, recognized vRad for successful health promotion efforts, including having an infrastructure in place that provides a supportive environment for developing lifelong healthy behaviors.

“We are honored to be recognized for both of these awards, and we are grateful to all of our team members and radiologists who make vRad the industry leader it is today,” said Shannon Werb, president and COO of vRad. “We are committed to providing an innovative and collaborative workplace that allows us to deliver cutting-edge imaging services driving excellence in patient care.”
