**FOR IMMEDIATE RELEASE**

**vRad Selected as one of the 10 Most Promising Telemedicine Solution Providers  
by CIOReview Magazine**

**MINNEAPOLIS, Minn. — (November 9, 2017) —** vRad (Virtual Radiologic), a MEDNAX, Inc. company and the nation’s leading teleradiology services and telemedicine company, announced today that it was selected as one of CIOReview’s 10 Most Promising Telemedicine Solution Providers for 2017. According to the magazine, vRad and nine other companies demonstrate “an ability to develop innovative technologies and methodologies while providing outstanding customer service” in the healthcare sector.

“We are pleased to be recognized among the top telemedicine and technology innovators by CIOReview,” said Shannon Werb, President and COO of vRad. “Our focus is to advance the overall practice of radiology delivering excellent patient care through technology and workflow innovation—whether it’s automatically routing studies to the most appropriate subspecialty-trained radiologist, automating the interaction a radiologist has with the patient study, or bringing our radiologists face-to-face with clinicians and patients through our Live Video Diagnostics services—our objective is to ensure our physicians operate ‘in the zone’ with every interpretation providing patients with the highest level of care regardless of time-of day or geographic location.”

### **About vRad**

vRad (Virtual Radiologic) is the leading national teleradiology services and telemedicine company with 500+ U.S. board-certified and eligible physicians, over 70% of whom are subspecialty trained. Its clinical expertise and evidence-based insight help clients make decisions about the health of their patients and their imaging services. vRad is a MEDNAX company, a national health solutions partner specializing in neonatal and other pediatric services, anesthesia, radiology, pediatric cardiology and other physician and management services. vRad interprets and processes patient imaging studies on the world's largest and most advanced picture archiving and communication system (PACS) for over 2,100 client hospitals, health systems and radiology groups in all 50 states. The company has 17 issued patents for innovation in telemedicine workflow and is a recognized leader in imaging analytics and deep learning-assisted diagnostics. vRad is also a past winner of Frost & Sullivan's Visionary Innovation Award for Medical Imaging Analytics (North America).
